[illegible][illegible][illegible]

Figure 1 is a line graph showing the percentage of total energy expenditure (TEE) for various activities across different age groups. The Y-axis represents % TEE (0 to 100) and the X-axis represents Age (0 to 100). The legend indicates: 0-10 (solid line), 11-20 (dashed line), 21-30 (dotted line), 31-40 (dash-dot line), 41-50 (long dashed line), 51-60 (short dashed line), 61-70 (dash-dot-dot line), 71-80 (dotted line), 81-90 (long dashed line), and 91-100 (solid line). Activities include: Sleeping (0-10% TEE), Eating (1-2% TEE), Drinking (1-2% TEE), Personal care (2-3% TEE), Dressing (2-3% TEE), Grooming (2-3% TEE), Hygiene (2-3% TEE), Transportation (3-4% TEE), Work (4-5% TEE), School (4-5% TEE), Recreation (5-6% TEE), Household (6-7% TEE), and Leisure (7-8% TEE). The graph shows that as age increases, the percentage of TEE spent on sleeping and eating decreases, while the percentage spent on work and school increases.

[illegible]

The diagram illustrates the experimental setup. A participant is seated at a table, looking at a video screen. A video camera is positioned above the screen to record movements. A light source is located to the left of the screen. A target is marked on the screen. The participant's hand is positioned near the target. The setup is used to study the effects of visual feedback on movement control.

[illegible]

Figure 1 is a schematic representation of the experimental design. It shows a sequence of events: 'Pretest' (with 'Pretest' and 'Posttest' labels), 'Training' (with 'Training' and 'Posttest' labels), and 'Transfer' (with 'Transfer' and 'Posttest' labels). The 'Pretest' and 'Training' phases are connected by a horizontal line, and the 'Training' and 'Transfer' phases are connected by a horizontal line. The 'Pretest' and 'Transfer' phases are also connected by a diagonal line. The 'Posttest' label is repeated for each phase.
